

**How to get a job  
when you don't have  
local experience.**

#DIVTALTIPS

# UPSKILL OR RESKILL

Taking a course relevant to the field you wish to enter is a great way to demonstrate your initiative and willingness to learn more. This will make you a more desirable candidate.

---

# Volunteer

Volunteering within your field could be an opportunity to gain some transferable skills that you can reference in your resume or in an interview. You could also get a local referee out of it.

---

# Network

These days getting a job is done through networks. Get on LinkedIn, connect and engage with business leaders and recruiters and go to industry events. You never know who might offer you your next role!
